## "For Computerized Security Management, think VigiCom"

# All Site Safety information at a glance!

**MCI-V3 is the Security dashboard of the site with instant consultation and easy entry of the daily events.**

## 1 - REMAINS TO DO

This window displays incidents reported by the agent that are not resolved yet.
The agent refers to the log of instructions to apply the procedure corresponding to the nature of the incident.

## 2 - ON-SITE VISITORS

This module allows to instantly know how many are visitors on the site and manage their entries and exits by completing a form with the reason of the visit. A directory of the on-site personnel or visitors is also available.

## 3 - PERMANENT / TEMPORARY TASKS

Execution of specific, recurrent or planned tasks with validation and observation.
Planning of events or missions.
Creation of event forms.
The agent must validate his task cards to leave his shift.

## 4 - LIST OF THE EQUIPMENT

Notifies the equipment used by the agent during his shift.
The agent must validate the equipment checklist to leave the position.

## 5 - GUARD TOUR REPORTING

Chronological consultation of the events.
Clock-in and clock-out.
Manual or assisted data and event entry.
Automated registrations.
Identification of the agent during his shift.
